

New manuals to support Anthony's AST and ATU Tuckunder series liftgates.

Anthony Liftgates now offers updated Parts and Installation & Operation Manuals to support the AST and ATU series of Tuckunder liftgates.

To better support our distributors and customers, we have developed two new manuals for our AST and ATU Tuckunder series liftgates.

Parts Manual

- Convenient Size – 7" x 8¹/₂", color-coded cover to match our new spec sheets, two-color content pages to help identify the main sections and to highlight all Safety points.
- New Photos and Drawings – We created new drawings and carefully identified each part number, including a brief description, quantity required, and important remarks.

Installation & Operation Manual

- Same convenient size and specifications as Parts Manual.
- Photos and Drawings – We identified all the steps required to install, operate, maintain, and troubleshoot AST and ATU Tuckunder liftgates, then carefully documented each step and procedure with new photographs and illustrations.

These manuals are shipped with each new AST and ATU liftgate that leaves our factory. If you would like a copy to use with your existing liftgate, please call Anthony Customer Support at (815) 842-3383. You can also fax your request to (815) 844-3612, or go to our website at www.anthonyliftgates.com and click on the manuals section to see these new manuals.
