

Anthony's MTU with *GLR*

# Gentle Level Ride

Anthony offers increased productivity with it's new pallet friendly, *GLR* system, now standard on all MTU liftgate models.

- 1 Smooth power up / power down horizontal lifting operation.
- 2 GLR platform tilts gently at the ground with no sudden moves or jerks.
- 3 Wider rollers under the platform distribute the weight to help eliminate parking lot "dig-in" when tilting.

Patent Pending

- Large capacity 80" x 60" platform, ideal for pallet loading
- Wedge design platform allows for easier loading and unloading with no bumpy ramp at end of platform.
- Easy to open/close spring-assist aluminum flip over platform section
- Heavy-duty steel main section
- Two models available: 3,000 and 4,000 lb. lifting capacities
- Foot-release dual pop-up cart stops
- Service-Free™ composite bushings used at critical pivot points
- Low operating pressure, large bore dual hydraulic cylinders
- Fully factory assembled, tested, and energized, ships complete with E-Z Mount installation
- Maximum duty dock bumpers

Pop-up cart stops

... plus all other Anthony quality features that help make Anthony the industry leader in innovative designs, performance, dependability, and value since 1941.
