

ANTHONY UPDATE

# Anthony Introduces a New Standard In Pickup Truck Liftgates

We started with a clean sheet of paper and used our years of liftgate experience to design and build the best pickup truck liftgate in the industry - the Anthony LoadBlazer.

**Heavy Duty Capacity** - 1,500 lb. lifting capability, dual hydraulic cylinder power.

**Large Platform & Opening** - Full 50" wide x 41" deep (+6" loading ramp) steel or aluminum platform and a 52 1/2" wide opening into truck bed. The two piece tread plate platform closes evenly with sides of truck bed for normal rear visibility.

**Side-to-Side Stability** - A unique design – the 3 inch, 11 gauge stabilizer beam connects two lift arms to balance heavy loads and add the rock-solid stability that separates the LoadBlazer from all other pickup liftgates. This Stabil-Lift design means side-to-side shifting of payloads is virtually eliminated.

To learn more about the new LoadBlazer liftgate or any other Anthony liftgate, please call Anthony Customer Support at 800-482-0003. You can also fax your request to 815-844-3612 or visit our web-site at [www.anthonyliftgates.com](http://www.anthonyliftgates.com) and reach us by e-mail.
