

ANTHONY UPDATE

# MRT Weather-Tight Connectors

**Look inside the pump box and near the traveling switch of any new Magnum RailTrac® liftgate and you'll find new weather-tight connectors used exclusively.**

**Weather-Tight Plugs**— *Designed specifically for automotive, off-highway, and tough applications, our new plugs create a sealed electrical connection system that will withstand exposure to extreme moisture and temperature.*

## Features

- *Connector and cavity seals are triple-ribbed and made of self-lubrication silicone to keep out moisture and prevent corrosion.*
- *Terminals utilize a flex-pin and lap-lock design to alleviate any problem of stress relaxation.*
- *Dual-locking tangs lock the connector cavity and help prevent backing out.*
- *Terminal plugging requires no orientation for positive indexing and no mis-mating of connectors.*
- *In the event the "traveling switch" is damaged, replacement is quick and convenient - no splicing of wires, simply unplug the connector.*

For more information about our new weather-tight connectors or any other quality standard features, call Anthony Customer Support at (815) 842-3383 or fax us your request at (815) 844-3612. Be sure to visit our web site at [www.anthonyliftgates.com](http://www.anthonyliftgates.com) and check out what else is new at Anthony.
