

Just when you thought it couldn't get any better . . .

Anthony makes EZ-Mount installation faster and easier!

On your mark, get set . . . weld! Installing floor extensions on Anthony Tuckunder liftgates with Anthony's pre-notched center mark template makes EZ-Mount installation even faster and easier.

"**M**EAASURE TWICE, cut only once" is an old Russian carpenter's proverb. While this wisdom may work well for old-world craftsmen, the competitive world of modern truck equipment demands more precise, predictable results. Enter Anthony's new pre-notched center mark template, a standard feature on all Anthony Tuckunder floor extensions. Centering the floor extension against the rear truck frame prior to welding is critically important to proper liftgate installation. Anthony's EZ-Mount pre-notched center mark template ensures accurate placement of the floor extension and precise spacing for all welds, all without measuring, even once! For more information about this or any other Anthony Tuckunder liftgate standard feature please call Anthony Customer Support at (815) 842-3383. You can also fax your request to (815) 844-3612. And be sure to visit our newly updated World Wide Web site at www.anthonyliftgates.com.
